

BEAUTPRESS TROJAN

IDEAL FOR MANUFACTURING COMPLEX TRUSSES AND SHORT RUNS

- Robust construction, simple controls and well guarded for operator safety
- Multiple jiggging options and a wide platen with 50/60 tonne pressing capacity
- Low maintenance, lightweight press head ensures faster acceleration
- High speed operation for pressing of complex roof trusses

Description:

The BeautPress Trojan is a high capacity platen press mounted on a heavy duty table. It is ideal for the manufacture of complex trusses and short production runs. Available with a variety of table top options including Uni-Strut or Tapped Steel, enabling fast setup. The wide platen and alternate 50-60 tonne pressing capacity enable simultaneous pressing of multiple joints, therefore reducing pressing time.

The BeautPress Trojan is a robust, stand-alone press with ride on platform and easy to use controls. The press is suitable for the manufacture of hardwood and softwood trusses, with overall dimensions less than the table dimensions.

Productivity:

- Fast pressing and travel time
- Variable travel speed.
- Long table ensures flexibility - customisable for application.
- Comes complete with simple jiggging hardware to reduce set-up time.
- Ideal for smaller trusses, hips, jacks and floor trusses.
- Ride on platform.
- Steel tapped table top.
- Two or more set-ups may be created on the table, increasing productivity

Heavy Duty Construction for Long Life:

- Powerful 50-60 tonne pressing capacity.
- Heavy duty welded steel platen to resist deflection and ensure even plate seating.
- No special installation requirements – just bolt down, level and connect the power.
- Robust and extensive safety guarding.
- Trouble free, heavy duty hydraulic system with pressure gauge, oil level detection warning and shut down feature, all of which provide smooth, efficient operation.
- Simple maintenance

Options:

- Uni-Strut rails with plastic (UHMWPE) pressing surface, available with jiggging tooling to suit.
- PosiStrut tooling - Specifications established at time of order.
- Hydraulic boost
- Power Connection Point - Left or Right of operator

BEAUPRESS TROJAN

IDEAL FOR MANUFACTURING COMPLEX TRUSSES AND SHORT RUNS

Configuration:

Press head travels on rails along the length of the fixed table and jig. The system is mounted on a standard reinforced concrete floor.

BEATPRESS TROJAN	
Pressing Capacity	50 Tonne standard and variable via valve 60 Tonne with Hydraulic Boost button engaged (Optional).
Platen Width	600mm
Table Size (Various sizes available)	Standard widths: 1.8m, 2.4m, 2.7m, 3.0m and 3.6m. Standard lengths: 10.5m, 12m, 15m and 18m.
Table Top Options	Uni-Strut or Tapped Steel
Working Area	Varies according to table size
Min Floor Space	Varies according to table size
Power	Varies according to table size
Weight	Varies with press size
Hydraulic Motor	15Hp (11kW)
