

# Ranger™ Retrieval System

With a custom Ranger™ Retrieval System feeding your saws, you decrease costs and improve efficiency, all from the moment timber enters your truss plant.

## FEATURES

- Makes the BLADE™ wood processing system fully automated on the infeed side.
- Moves timber to the saw consistently and quickly.
- Stores timber of varying dimensions in a compact space.
- Reduces picking errors and costly mistakes.

## PHYSICAL DATA

<b>System Length</b>	6-35m
<b>Timber Storage: Standard Cart</b>	Standard Cart (width): 800mm (Australian Pine) or 1000 mm (Imported Pine)
<b>Timber Storage: Magazine Cart</b>	Holds different sizes of timber

## PERFORMANCE DATA

<b>Speed of Trolley</b>	9000m/h without timber 6000m/h with timber
<b>Timber Size</b>	Width: 70mm-300mm Thicknes: 35mm and 45mm

## ELECTRICAL DATA

<b>Electrical Specs</b>	416V, 50/60 Hz, 3-phase (required transformer)
-------------------------	--

## ELECTRICAL DATA

<b>E-stops</b>	Pushbuttons
<b>Safeguards</b>	Physical safety fence with light curtains, obstructions sensors
<b>Safety Compliance</b>	UL (panels), OSHA

## OPTIONS

- Runway truss length can be customised.
- Select left- or right-side of runway truss to load from.
- Select front or rear of saw to load onto Infeed Rail.
